

# *Nutrient Management: Source*

## *What's in the bag?*

N – % Nitrogen  
(growth and photosynthesis)

P – % Phosphate ( $P_2O_5$ )  
(cell division and energy)

K - % Potash ( $K_2O$ )  
(energy and water balance)

Example:

50 lb bag of 24-8-16 fertilizer has 24% N, 8% P, and 16%K

50 lbs x 0.24 = 12 lbs of N

50 lbs x 0.08 = 4 lbs of P

50 lbs x 0.16 = 8 lbs K

*But is this what you need?*
